Lam Tran

Software Developer

About me

I am a software developer with over 10 years of experience in the software development industry. I am currently focused on the backend technologies, but in the past I've worked as a full stack developer as well. I have experiences with lots of different technologies around Java and Node.js web ecosystems. Outside of my work as a developer, I also teach various IT courses for a Czech NGO Czechitas (e.g. JavaScript, React, testing, SQL).

I've studied the University of Economics in Prague and therefore I have background in economics and finance as well. I speak fluently Czech, English and Vietnamese. I also have basic knowledge of German as I lived in Munich, Germany for 6 years.

Skills

Java | Javascript | Node.js | Spring | kubernetes | Docker | OpenTelemetry

Experience

Senior Backend Developer

IP Fabric, Inc.

April 2025 - December 2025

I helped the team implement new customer-requested features and contributed to resolving security issues that enabled the company to acquire new clients. Besides programming, I also communicated with other teams to complete my tasks effectively.

Software Developer

commercetools GmbH

September 2015 - April 2025

I participated in the development of e-commerce systems for various customers (e.g. AUDI, Carhartt), mainly as a backend developer. Later I moved to a new team that develops tooling for the platform. My main focus was Java and JavaScript SDKs and a new observability tool. I also interviewed and helped new developers with their tasks.

Education

University of Economics in Prague

2008 - 2014

Master degree in Informational systems and technologies

University of Queensland, Brisbane

2013

Exchange student for one semester

Projects

commercetools adyen integration

node.js

Integration between commercetools platform and adyen payment platform

commercetools typescript SDK

node.js

TypeScript SDK for commercetools platform
